

# the total systems approach

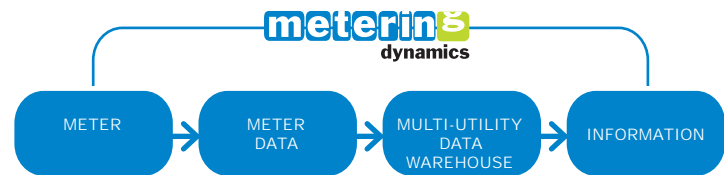

intelligent.

to metering data collection & information analysis

Metering Dynamics offers a range of multi-utility metering, information and energy measurement solutions throughout Australia with support offices in Sydney, Melbourne and Adelaide and Headquarters in Brisbane.

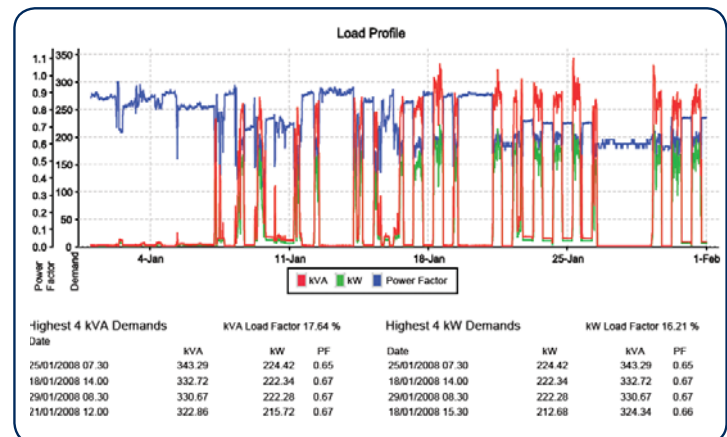

Servicing customers in the contestable, franchise, residential, small business, major industrial, manufacturing and utility markets, Metering Dynamics' tailor made products and solutions lead the industry in innovation and technical expertise.

Metering Dynamics is one of australia's largest metering businesses, delivering innovative multi-utility metering solutions to maximize energy efficiency, reduce costs and assist with compliance reporting.

## Metering Dynamics provides:

- National Electricity Market Metering Services through our accredited Metering Data Agency
- Automated remote multi-utility metering systems and associated services, including turn key project management for metering systems
- Information and Management Solutions – enabling better understanding, management and reporting of meter data.

### Australian Energy Market Operator (AEMO)

accreditation for Metering Provider (MP) and Metering Data Agency (MDA) services for all metering system classifications to the Australian National Electricity Market (NEM).

### Labratory

accreditation with the National Association of Testing Authorities, Australia (NATA) to AS ISO/IEC 17025

### Quality

certifications to AS/NZS ISO9001 and ISO14001

## the benefits of our approach

Metering Dynamics has a range of products and services that are used by many of Australia's leading corporations and small businesses alike. Our clients benefit from:

- Proven multi-utility systems to collect, store, validate and deliver data;
- Exceptional information management systems enabling a greater understanding of energy and utility usage;
- Reporting tools for compliance requirements with the latest legislations such as Energy Efficiency Opportunities (EEO), National Australian Built Environment Rating System (NABERS), National Greenhouse and Energy Reporting System (NGERS) and Greenstar;
- standard metering price per metering point per annum irrespective of its geographical location within the National Electricity Market (NEM);
- Access to a range of value adding data services available from the latest technology in metering equipment;
- A data warehousing service of all NEM contestable meter provision and Meter Data Agency (MDA) services.

## finding the best solution for you

Crucial energy management information on a desktop computer or a web site can become irrelevant without a defined undertaking to use the data in a structured manner. The best option should be determined by the ability of the energy user to:

- Provide a dedicated resource;
- Install and maintain the required IT systems to manage the data;
- Access industry information to benchmark and validate the data being monitored to enable accurate interpretation.

If there is any doubt then a cost effective out-sourced provider will be able to offer a practical solution.

By choosing Metering Dynamics you get:

- An Independent Meter Provider (MP);
- An Independent Meter Data Agent (MDA);
- Transparency of Process;
- Flexibility to direct Data to Service Providers on demand;
- A business with NATA registration and accreditation.
