

the total systems approach

to creating and delivering innovative electricity metering and management solutions

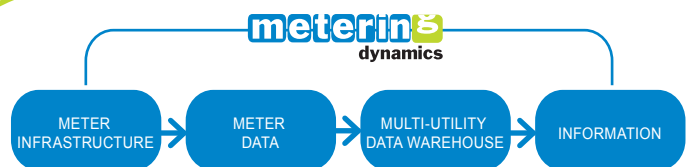

intelligent.

Metering Dynamics offers state-of-the-art metering services to the commercial, industrial, government sectors and small residential sector. The timely and accurate data obtained from these meters allows our customers to take control of their energy usage more efficiently.

Established in 1999 as a subsidiary of Energex, we are an Australian Electricity Market Operator (AEMO) accredited Metering Provider (MP) and Metering Data Provider (MDP) operating in Australia's National Electricity Market (NEM).

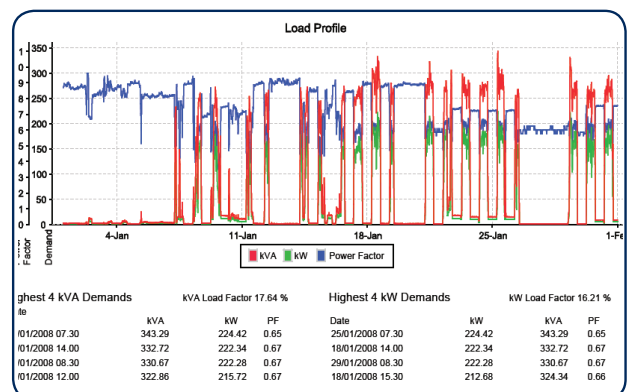

Headquartered in Brisbane, Australia, we have support offices in Sydney, Melbourne and Adelaide.

Metering Dynamics is one of Australia's largest metering businesses. We deliver a range of multi-utility metering, information and energy measurement solutions to maximise energy efficiency, reduce costs and assist with compliance reporting.

Metering Dynamics provides:

- National Electricity Market Metering Services through our accredited Metering Data Agency.
- Automated remote multi-utility metering systems and associated services, including turn key project management for metering systems.
- Information and Management Solutions – enabling better understanding, management and reporting of meter data.
- State of the art NMI pattern approved electricity meters, and associated integration devices from leading manufacturers via our online e-commerce sales platform "MeterShop."

insightful.

certification/accreditation

Australian Energy Market Operator (AEMO)

Accreditation for Metering Provider (MP) and Metering Data Agency (MDA) services for all metering system classifications to the Australian National Electricity Market (NEM).

Laboratory

Accreditation with the National Association of Testing Authorities, Australia (NATA) to AS ISO/IEC 17025.

Quality

Certification under AS/NZS ISO 9001 Quality, AS/NZS ISO 14001 Environment and AS/NZS 4801 Safety Standards.

the benefits of our approach

Metering Dynamics has a range of products and services that are used by many of Australia's leading corporations and small businesses alike. We are driven by the rapidly evolving world of energy, and emerging technologies. We see this shift as a tremendous opportunity to grow and focus on helping clients with their needs.

We are committed to providing a dynamic, dependable and proven total systems approach. Our clients benefit from:

- Proven multi-utility systems to collect, store, validate and deliver data.
- Exceptional information management systems enabling a greater understanding of energy and utility usage.
- Reporting tools for compliance requirements with the latest legislations such as Energy Efficiency Opportunities (EEO), National Australian Built Environment Rating System (NABERS), National Greenhouse and Energy Reporting System (NGERS) and Greenstar.
- Standard metering price per metering point per annum irrespective of its geographical location within the National Electricity Market (NEM).
- Access to a range of value adding data services available from the latest technology in metering equipment.
- A data warehousing service of all NEM contestable meter provision and Meter Data Agency (MDA) services.

how we can help you

Installation - We install type 1-4 interval meters for small and large customers. Each meter is 4G enabled to ensure reliable data transmission.

Connections - We will connect the meter and test the reliability of the hardware and the meter's data transmission to the information systems.

Insights - Reduce energy costs and make smarter decisions by knowing the equipment faults and inefficiencies based on the energy performance.

With a wealth of experience and the knowledge of the trade, Metering Dynamics will make sure you are well and truly looked after.
