

# Power Quality Report ADHOC Request

Please Note: **Metering Dynamics can extract Voltage and Current data for a limited number of historical days. It's important to request a power quality report soon after a power quality event occurs.**

## Report Format

☐ **Volts & Currents (PDF)**

☐ **Tabulated Data (CSV)**

**Note:** Both versions will be accompanied by a Sag Swell Report. With the exception of customers who are requesting a large list of sites. Bulk requests will be provided with a variation of the Tabulated Data CSV and Sag Swell reports WILL NOT be provided.

## List of Sites / NMI's (For additional NMI please attach a separate list)

NMI	Site Name	Site Address	Suburb	State

**Note:** If the requestor is not the end customer or an approved person on the customer contract, customer authority will need to be provided.

Customer Letter of Authority - Specific Letter of Authorisation from Customer on company letterhead signed by its duly appointed representative addressed Metering Dynamics Pty Ltd – authorising the delivery of Power Quality data to an authorised party (please specify authorised party on letter)

**Your request will be billed at the standard price of \$65.00 + GST per meter or per services detailed in your Contestable Customer Metering Agreement.**

## Billing Details
